

FARES KHANCHOUCH

Forward Deployed Engineer • Integrations & LLM Agent Tooling

fares.khanchouch@gmail.com • Tunis, Tunisia • fareskhanchouch.com • linkedin.com/in/fares-khanchouch •
github.com/Fares-Khanchouch

PROFESSIONAL SUMMARY

Integration Consultant at Axe Finance delivering credit-platform changes for banks in Qatar and Saudi Arabia from **scoping to go-live**, including core-banking data feeds and a new SMS alert channel. Previously built n8n and Make automations for 6+ clients, from KYC pipelines to a 100,000+ record Airtable migration, with custom JavaScript/Python.

PROFESSIONAL EXPERIENCE

Integration Consultant • Axe Finance

Dec 2025 – Present | Tunis, Tunisia

- Owned change requests for a Qatari bank's credit platform end to end, from scoping to go-live, across **2 production releases**: a short-form credit request and a direct-rework path that skips the full approval chain.
- Integrated a Saudi bank's core banking system with Axe Credit Portal via **C# REST services** (customers, limits, outstandings), and added rule-driven SMS alerts secured with API keys, OAuth and IP whitelisting.
- Built internal Python tooling (MCP servers, Claude skills) that explains platform configuration with cited sources.

Freelance Automation Engineer • Independent

Sep 2024 – Nov 2025 | Remote

- Built n8n KYC pipelines for an ISO-compliance consultancy: company research via APIs and Perplexity, LLM/OCR document extraction and enrichment, delivered into the tools their team used.

Cloud & DevSecOps Intern • Nuage Up

May 2024 – Aug 2024 | Paris, France

- Deployed multi-service applications to Kubernetes on EC2 and wrote their network policies and RBAC rules.

Full-Stack Web Development Intern • WAY2CLOUD

May 2023 – Aug 2023 | Paris, France

- Built an e-commerce platform solo in 3 months with React.js, Node.js and MongoDB, from UI to database.

DevOps Intern • WAY2CLOUD

Jun 2022 – Jul 2022 | Paris, France

- Built a Python REST API automating Kubernetes cluster lifecycle operations, replacing manual cluster management.

PROJECTS

n8n Kubernetes Operator (Go) • github.com/Fares-Khanchouch/n8n-operator

- Built a Kubernetes operator in Go that deploys n8n with PostgreSQL from a single custom resource, replacing **8+** hand-written manifests (deployments, services, PVCs, secrets, ingress).

Job-Market Data Platform & Grounded LLM Generation (personal project)

2024 – Present

- Built LLM output guardrails: every generated claim traced to a versioned fact store, with numeric-hallucination and cross-document consistency checks that reject unsupported text.
- Built an agent-in-the-loop eval harness that drove fixes: coverage of postings' hard requirements rose **from 54% to 100%**, and bullets judged overclaimed fell from 6% to 0%.

TECHNICAL SKILLS

Delivery: client scoping, BRD/FSD, BPMN workflows, UAT and SAT, go-live and post-go-live support, Agile

Backend & Integration: REST APIs (C#, Node.js, Python), webhooks, OAuth, API keys, IP whitelisting

Programming: Python, TypeScript, JavaScript (Node.js, React), T-SQL, C#, Go

AI & LLM: MCP servers, Claude agent skills, LLM APIs, LLM evals, LLM output guardrails, embeddings

EDUCATION

Engineering Degree in Computer Science (Information Systems Architecture) •
ISTY, Université Paris-Saclay

2021 – 2024 | Vélizy-Villacoublay, France

LANGUAGES

English: C1 (TOEIC 985/990) • French: C1 • Arabic: Native (Tunisian; communicates across Arabic dialects)
