

FARES KHANCHOUCH

Forward Deployed Engineer • Integrations & LLM Agent Tooling

fares.khanchouch@gmail.com • Tunis, Tunisia • fareskhanchouch.com • linkedin.com/in/fares-khanchouch •
github.com/Fares-Khanchouch

PROFESSIONAL SUMMARY

Integration Consultant at Axe Finance, delivering credit-platform changes for banks in Qatar and Saudi Arabia from scoping to go-live. Built MCP servers with 50 typed tools and **11 Claude skills** that reason over a live bank deployment. Previously a solo automation engineer for 6+ clients. Native Arabic, fluent French and English.

PROFESSIONAL EXPERIENCE

Integration Consultant • Axe Finance

Dec 2025 – Present | Tunis, Tunisia

- Built an agent interface to Axe's credit platform in Python: MCP servers exposing **50 typed tools** plus an 11-skill Claude pack, so an agent can explain a live bank deployment and cite its sources.
- Owned 2 of 4 change requests for a Qatari bank's corporate and SME credit platform end to end: scoping, build, UAT, SAT, go-live and post-go-live support, across **2 production releases**.
- Integrated a Saudi bank's core banking system with Axe Credit Portal via **C# REST services**, auto-fetching customers, limits and outstandings into credit workflows instead of manual lookup.

Freelance Automation Engineer • Independent

Sep 2024 – Nov 2025 | Remote

- Delivered automation projects for **6+ clients** as a solo engineer, from scoping to handoff, mostly in n8n and Make with custom JavaScript/Python.
- Built an AI content pipeline publishing **~50 posts a week** across TikTok, Instagram and X: LLM-written scripts, ElevenLabs voice-overs, generated images, Whisper captions and assembled videos.

Cloud & DevSecOps Intern • Nuage Up

May 2024 – Aug 2024 | Paris, France

- Deployed multi-service applications to **Kubernetes** on EC2 and wrote their network policies and RBAC rules.

Full-Stack Web Development Intern • WAY2CLOUD

May 2023 – Aug 2023 | Paris, France

- Built an e-commerce platform solo in 3 months with React.js, Node.js and MongoDB, covering the whole stack from UI to database.

DevOps Intern • WAY2CLOUD

Jun 2022 – Jul 2022 | Paris, France

- Built a Python REST API automating **Kubernetes** cluster lifecycle operations for the infrastructure team, replacing manual cluster management.

PROJECTS

Job-Market Data Platform & Grounded LLM Generation (personal project)

2024 – Present

- Built a Python MCP server that crawls 63,000+ company job boards through 24 ATS adapters (Workday, Greenhouse, SuccessFactors...) into one normalized SQLite store of **1.1M+ postings**.
- Built an agent-in-the-loop eval harness that drove fixes: coverage of postings' hard requirements rose **from 54% to 100%** of runs, blind reviewer résumé scores from 5.1 to 6.3/10.

TECHNICAL SKILLS

AI & LLM Tooling: MCP servers, Claude agent skills, LLM APIs, ElevenLabs, Whisper, Perplexity, local embeddings (ONNX)

Backend & Integration: REST APIs (C#, Node.js, Python), webhooks, OAuth / API-key / IP-whitelist auth

Languages: Python, TypeScript, JavaScript (Node.js, React), T-SQL, C#, Go

EDUCATION

Engineering Degree in Computer Science (Information Systems Architecture) •
ISTY, Université Paris-Saclay

2021 – 2024 | Vélizy-Villacoublay, France

LANGUAGES

English: C1 (TOEIC 985/990) • French: C1 • Arabic: Native (Tunisian; communicates across Arabic dialects)
